ABOUT ME

Solidity Developer with a strong background in blockchain technology, developing and optimizing smart contracts since 2021. Experienced in Solidity auditing, with hands-on work identifying vulnerabilities and improving contract security.

EXPERIENCE

Co-Founder, CTO & Lead Developer

Remote

Birdgames

2025-Present

- Co-founded a blockchain gaming startup from the ground up, overseeing all aspects of technical development and strategy.
- Led the release of 4 games published on WorldChain's miniapp store, managing both frontend and smart contract development.
- Scaled the platform to over 100,000 users and facilitated more than 2M in on-chain transaction volume.

Solidity Security Researcher / Auditor

Remote

codehawks.cyfrin.io

2024

- Participated in my first public auditing competition for the **One World Project**, securing a Top 5 position among auditors.
- Gained hands-on experience in identifying vulnerabilities and reporting issues in smart contracts submitted by third-party companies.
- Competed in a highly collaborative and competitive environment, enhancing my skills in bug hunting and smart contract security.

Full Stack Engineer - Web3

Italy

BloodLoop

2024 - 2025

- Collaborated with a multidisciplinary team to design and implement front-end solutions for a comprehensive Web3 marketplace, including a login system and inventory management.
- Leveraged Next.js and Tailwind CSS to create seamless and responsive user interfaces, ensuring an engaging user experience.
- Integrated Thirdweb and Ethers.js to enable blockchain functionality, smart contract interactions, and wallet connectivity.

Blockchain Consultan & Solidity developer

Italy

BloodLoop

2024

- Collaborated with the team to design and implement comprehensive blockchain solutions for the game Bloodloop, covering NFTs, in-game skins, shop, auction house, and innovative refinement systems. Utilized tools including Solidity, Scaffold-ETH, Hardhat, IPFS, and Next.js.

Chief Technical Officer

Argentina

Nightz.co

2023-2024

- Smart Contract Developer responsible for interviewing and hiring a full team, leading and directing the technical development of the entire application. Developed all smart contracts within the platform. Team size: 5+ members.

Smart Contract / FrontEnd Developer

Spain

Aurinext

2022

- Developed smart contracts for the Educaverse project, including token and presale contracts. Built the presale front-end using JavaScript, React, and Web3.js. Collaborated effectively using Slack and Confluence.

Solidity Lead
Comadran Studios

Spain
2022

- Developed smart contracts for the Medabots project, brainstorming and implementing innovative solutions. Audited blockchain team contracts and created small front-end interfaces for testing. Built token marketplace and lock contracts for exchanges.

SKILLS

Skills: SmartContracts(Solidity), Blockchain, Hardhat/Foundry, Auditing, JS, TS, React, Next, Web3

PROJECTS

- Share content**
Shared video tutorials on YouTube focused on crypto development topics.

2020
- Aave Liquidator**
Developed scripts for executing liquidations in the Aave v3 protocol.

2024

EDUCATION

Universidad Nacional de Mar del Plata, Argentina
Software Engineering

2015-2019
